Education

Harcourt Butler Technical University

Bachelor of Technology in Information Technology — CGPA: 7.7/10

Sep. 2023 – May 2027

Kanpur, Uttar Pradesh

Professional Summary

Information Technology undergraduate with hands-on experience in Machine Learning, NLP, data analysis, Python, DSA, and frontend development. Experienced in data preprocessing, EDA, feature engineering, and developing ML classification models through academic and personal projects.

Experience

Web Development Intern

2026

InAmigos Foundation

Remote

- Analyzed website design, structure, and user experience to identify areas for improvement.
- Suggested UI/UX improvements to enhance website navigation, responsiveness, and visual presentation.
- Designed and developed a portfolio website using Framer, focusing on modern design, responsive layouts, and smooth user interaction.
- Gained hands-on experience in real-world web development projects.

Projects

1. NLP-based multi-class classification model | Python, NLP, Scikit-learn, Pandas, NLTK, Streamlit [GitHub] 2026

- Built an **NLP-based multi-class classification model** to classify text into six emotions: **Sadness, Anger, Love, Surprise, Fear, and Joy**.
- Performed **text preprocessing** including lowercasing, punctuation and digit removal, tokenization, stopword removal, and duplicate removal.
- Applied **Bag-of-Words** and **TF-IDF** for text feature extraction and compared **Naive Bayes** and **Logistic Regression** classifiers.
- **Live Demo:** <https://nlp-based-emotion-classification-k4wptrntjunappzzpkgg5am.streamlit.app/>

2. Netflix Movies & TV Shows Data Analysis | Python, Pandas, NumPy, Matplotlib, Seaborn [GitHub] 2026

- Analyzed **8,800+ Netflix titles** to identify trends across content types, genres, ratings, countries, and release years.
- Performed data cleaning and preprocessing by handling missing values, removing duplicates, and converting date formats.
- Applied **feature engineering** to extract year/month from dates and derive movie duration and TV show season features.
- Conducted **EDA and statistical analysis** using Pandas, Matplotlib, and Seaborn to generate data-driven insights through visualizations.

Technical Skills

Programming Languages: Python, C++, JavaScript

Machine Learning: Scikit-learn, Linear Regression, Logistic Regression, Naive Bayes, KNN, SVM, Decision Trees, Random Forest, K-Means, DBSCAN, PCA, Supervised Learning, Unsupervised Learning, Model Evaluation, Feature Engineering

NLP: Text Preprocessing, Tokenization, Stopword Removal, Bag-of-Words, TF-IDF, Text Classification

Data Analysis: Pandas, NumPy, Matplotlib, Seaborn, EDA, Data Cleaning, Statistics

Frontend: HTML, CSS, JavaScript

Backend: Node.js, Express.js

Database: PostgreSQL

Version Control: Git, GitHub

Developer Tools: Jupyter Notebook, Google Colab, VS Code
