Education

Harcourt Butler Technical University

Bachelor of Technology in Information Technology — CGPA: 7.7/10

Sep. 2023 – May 2027

Kanpur, Uttar Pradesh

Professional Summary

Information Technology undergraduate with a strong foundation in programming, DSA, web development, and problem-solving. Developing skills in AI/ML and data analytics through hands-on projects. Passionate about building interactive web applications and intelligent, data-driven solutions.

Experience

Web Development Intern

InAmigos Foundation

2026

Remote

- Developed and improved responsive web interfaces using HTML, CSS, and JavaScript.
- Worked on website design improvements and enhanced user experience and visual presentation.
- Gained hands-on experience in frontend development and real-world web development projects.

Projects

1. Personal Portfolio Website | *React.js, JavaScript, HTML, CSS, Vite* [GitHub] [Live Demo]

2026

- Built a responsive personal portfolio using **React.js** and reusable components to showcase projects, skills, education, and experience.
- Implemented interactive UI, smooth navigation, responsive layouts, and reusable sections using **JavaScript, HTML, and CSS**.
- Used **Vite** for development and build optimization, and deployed the production website on **Vercel**.
- Managed source code and project updates using **Git and GitHub**.

2. Netflix Movies & TV Shows Data Analysis | *Python, Pandas, NumPy, Matplotlib, Seaborn* [GitHub]

2026

- Analyzed **8,800+ Netflix titles** to identify trends across content types, genres, ratings, countries, and release years.
- Performed data cleaning and preprocessing by handling missing values, removing duplicates, and converting date formats.
- Applied **feature engineering** to extract year/month from dates and derive movie duration and TV show season features.
- Conducted **EDA and statistical analysis** using Pandas, Matplotlib, and Seaborn to generate data-driven insights through visualizations.

Technical Skills

Programming Languages: Python, C, C++

Frontend: HTML, CSS, JavaScript, React.js

AI/ML & Data: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Statistics, EDA, Feature Engineering, Model Evaluation

Database: SQL

Version Control: Git, GitHub

Developer Tools: Jupyter Notebook, Google Colab, VS Code

Achievements

- Solved **400+** Data Structures and Algorithms (DSA) problems on **LeetCode**, strengthening problem-solving and algorithmic skills.
- Completed a **Web Development Internship** at InAmigos Foundation, gaining hands-on experience in frontend development and responsive web design.
- Built and deployed a **React.js personal portfolio website** using reusable components, responsive UI, and Vercel.
- Developed an end-to-end **EDA project** using Python, Pandas, NumPy, Matplotlib, and Seaborn, applying data cleaning, feature engineering, and visualization techniques.
